

Are you looking for your next big adventure? Do you have a track record of excellence, a curiosity for life, and a passion for the outdoors, authentic experiences, and local culture? If this sounds like you, this opportunity may be just what you've been looking for.

The Place:

Botánika Osa Peninsula, Curio Collection by Hilton is located on Costa Rica's South Pacific Coast, a world-class sport fishing and eco-adventure destination. Slated to open in December 2021 as Costa Rica's first fully integrated, branded residential resort and marina development, Botánika will offer guests a truly immersive rainforest experience with a wide range of guided eco-adventures. With Corcovado National Park in its 'backyard' and the Pacific Ocean in its 'front yard,' Botánika is virtually surrounded by national parks and forest reserves. Its unrivalled location makes it the perfect base camp from which to explore Costa Rica's incredible biodiversity. Guests will enjoy countless amenities, including nature trails, themed gardens, a private beach club, and access to Crocodile Bay Marina, home to the largest private sport fishing fleet in Central and South America.

The Job:

If you are an experienced Director of Engineering who is passionate about safety and possesses knowledge and skills in plumbing, electrical, HVAC and overall building maintenance, we'd love to hear from you. We are currently seeking a Director of Engineering who can oversee and supervise the Hotel's Maintenance and Engineering Department including personnel, facilities, budgeting, capital expenditures relating to the resort campus and construction projects which are executed on property.

We are committed to creating a vibrant and successful team environment that embraces our community and environmental values. We offer a competitive compensation and benefits package with an exciting and engaging work environment. Consider joining us if you seek an opportunity that lets you truly love where you live and work.

- Establish and maintain budget for the hotel's Engineering/Maintenance department.
- Works with property and regional engineering leadership team to determine how Engineering is performing against budget and highlights areas of concern to leadership.
- Manages the physical plant including equipment, refrigeration, HVAC, plumbing, water treatment and electrical systems in accordance with Standard Operating Procedures.
- Ensure that all room/public area/back-of-house/tenant area work orders are assigned and completed in a timely manner. These areas include the pool and associated deck, public restrooms, front entrance, tenant spaces as allowed for by lease, elevators, fitness center, back-of-house, corridors and guestrooms. Ensure that a preventative maintenance program is in place to minimize the amount of repairs and guest complaints we receive.

Requirements:

- Bilingual – Spanish/English speaking
- High school diploma or GED
